

Siemens Energy Expands Use of Mainsaver

San Diego, CA and Orlando, FL – November 14, 2017 -- Siemens Energy continues to expand its use of the Mainsaver product throughout its managed power generation facilities, as it announced it will implement the Spanish edition of Mainsaver at its new combine cycle, Empalme II power generation plant located in Sonora, Mexico. When completed, the natural gas fired plant will generate up to 791 megawatts of power. It is expected to begin operation in April of 2018.

Siemens again called on Mainsaver for its asset management solution, as it continues to enjoy ongoing success using the Mainsaver product to manage a large portion of its generating stations business processes. The Empalme II site will be no different. It will utilize Mainsaver for asset life cycle management to include, PM and corrective work order processing as well as parts and materials management.

With the addition of the Empalme II site, Siemens will now utilize Mainsaver for its asset management solution in 13 power plants across both North and South America.

About Siemens

Siemens Corporation is a U.S. subsidiary of Siemens AG, a global powerhouse focusing on the areas of electrification, automation and digitalization. One of the world's largest producers of energy-efficient, resource-saving technologies, Siemens is a leading supplier of systems for power generation and transmission as well as medical diagnosis. With approximately 351,000 employees in 190 countries, Siemens reported worldwide revenue of \$88.1 billion in fiscal 2016. Siemens in the USA reported revenue of \$23.7 billion, including \$5.4 billion in exports, and employs approximately 50,000 people throughout all 50 states and Puerto Rico.
