

B&G Foods Adds Mainsaver to Green Giant Vegetables Plant

San Diego, CA and Parsippany, NJ – May 30, 2018: B&G Foods has established or acquired many iconic food brands over its 125 year history. The brands include ‘Cream of Wheat’, ‘Ortega’, ‘Underwood’ and ‘Pirate’s Booty’. As part of B&G’s missions to profitably produce safe, quality products, all plants utilize Mainsaver Software for maintenance, inventory and purchasing. This summer, B&G will implement Mainsaver at the Green Giant frozen vegetable production facility in Irapuato, Mexico.

Mainsaver will be used for work requests, work orders, preventive maintenance, materials and purchase requisitions. The Irapuato plant has goals to increase reliability and identify potential failures by using predictive technologies and storing the data values within the Mainsaver database. The entire Maintenance organization will use Mainsaver with skilled trades completing work orders and supervisors reviewing and closing out work.

The Irapuato plant will have Mainsaver up and running in August of 2018. Mainsaver is providing a turnkey implementation including conversion of legacy data into a Mainsaver database, training and startup support. Mainsaver will also integrate into the Microsoft Dynamics ERP system.
