

# Mainsaver Connect

## Mainsaver Connect

Mainsaver Connect provides core Asset Management functionality to the mobile workforce. Mainsaver Connect supports application portability across multiple hardware platforms such as Smartphones, Tablets, and Laptops; utilizing Windows, iOS and Android operating systems and supporting multiple web browser technologies such as Internet Explorer, Safari, Chrome and Firefox.

### Connect App Functions

#### Work Orders & Materials

- Create a new Work Order, with the option to add a picture attachment
- Scan a QR or Bar Code of an Asset Number, to see open work orders or create a new work order.
- Find open work orders in the Work Queue, with predefined filters for Open Work Orders and My Work.
- Take actions on work orders:
  - o View Details, Edit, Complete, Close
  - o Add Timecards, Add Materials Used,
  - o Start/Stop Work
  - o Job Plans: Update Tasks and Results
- Access to work order peripherals:
  - o WO Print, Asset Safety Notes, Reference Files
  - o View Asset History
- Material issues to work orders and assets

#### Additional Features

- 21 CFR 11 electronic signature sign off
- Barcode and QR code scanning (Asset Number and Stock Number)
- Email Notifications via defined event triggers
- Field-level configurations (required/read-only/invisible)
- Login to the app with Windows Authentication
- Option to set a timeout for idle/inactive sessions, and option to require login each time app is opened.
- Application Security (using Connect security settings in Mainsaver Core Application)
- Ability to access reference files setup with a mapped drive.
- Option to use either List View or Grid View formats for the Work Queue.
- Grid View provides sorting, filtering and grouping capabilities.
- Both Online and Offline capabilities for caching transactional data when wifi is unavailable
